BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

The Public Works Department requested bids for the Traffic Pavement Markings Pricing Agreement in November of 2007. The scope of work will consist of furnishing and installing non-reflective circular white and yellow pavement markers, reflectorized pavement markings, reflectorized preformed plastic markings, 3M lane marking tape, and reflectorized plastic pavement markings on various City paving projects on an as-needed basis. These items will be furnished and installed in compliance with the Manual of Uniform Traffic Control Devices (latest edition) and the New Mexico State Highway and Transportation Department Standard Specifications for Road and Bridge Construction (latest edition).

The pricing agreement was approved as a one-year contract with an option to renew for two (2) additional one-year periods providing the unit prices and terms and conditions remain the same. This extension will be the final renewable option.

The Public Works Department contacted R^2 Contractors Specialty, Inc. regarding their willingness to extend the contract for an additional one-year period. The vendor agreed to the one-year extension.

The Public Works Department recommends that the City exercise the final option to extend the Traffic Markers Pricing Agreement for a one-year period with R^2 Contractors Specialty, Inc. The pricing agreement can be used city-wide and, as such, funding will be made available from a variety of sources as projects are identified.

This will give potential users the flexibility to hire this contractor on an as needed basis using unit prices that are set for the specified one-year period.

2. Vote "No". This action will reject the proposed contract extension and instruct staff to either re-bid the project, re-scope the project or abandon the project altogether. Without this pricing agreement, potential users will have to explore an alternative means of procuring these services.
