

Yellow Dot Program

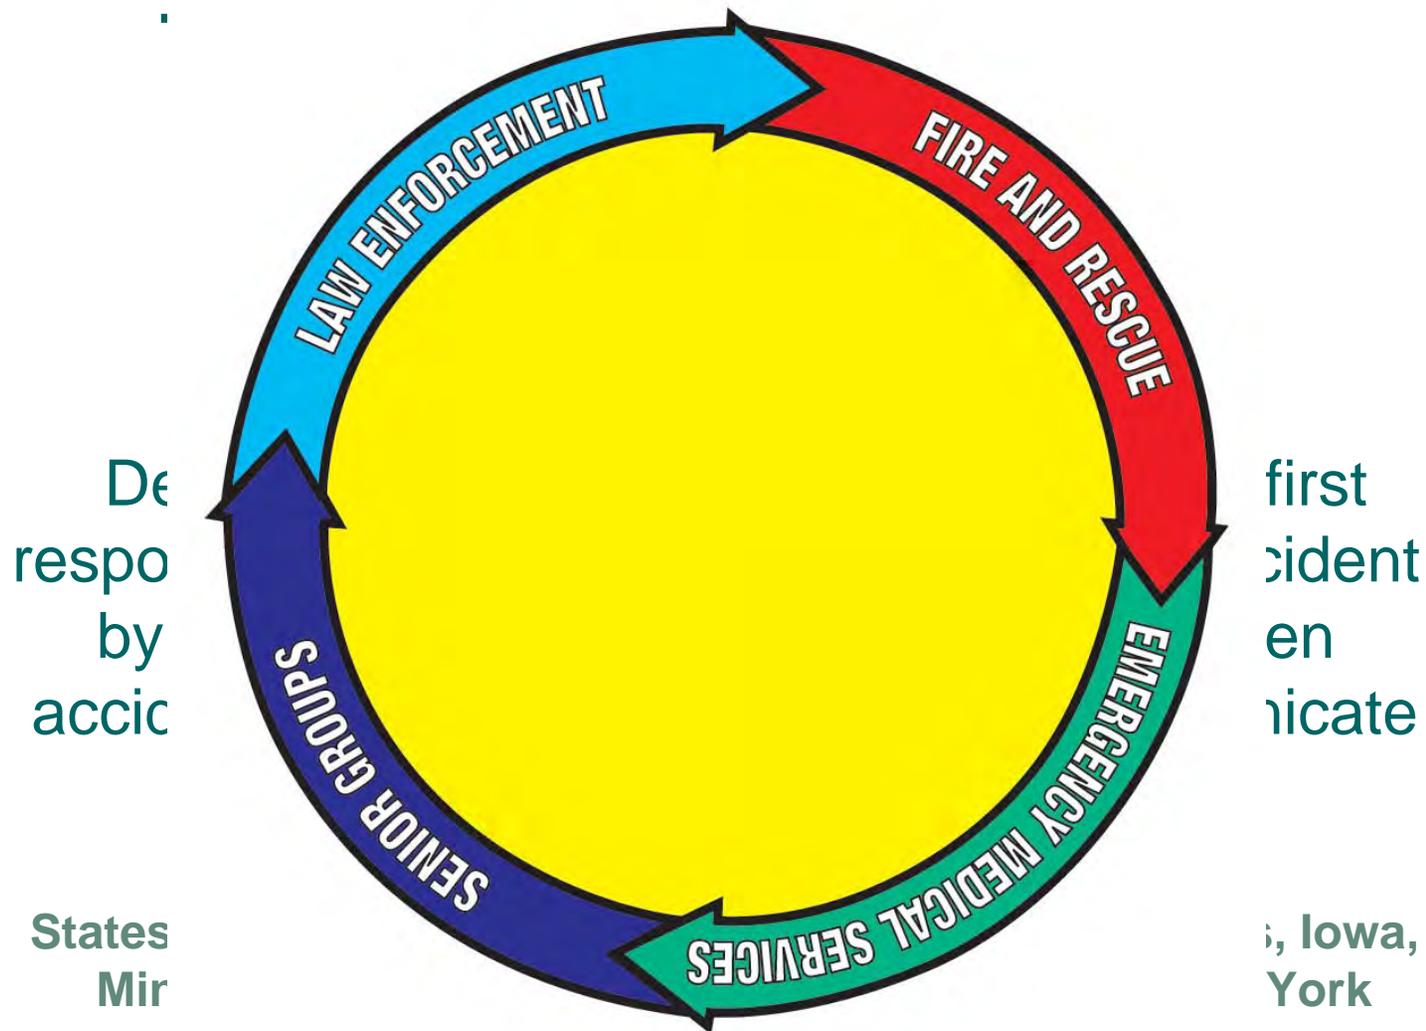

Yellow Dot Program

With this presentation will be the introduction of the Yellow Dot Program, which is designed to help motorists identify medical and other conditions during automobile or motorcycle accidents when they might not be able to communicate for themselves. The Yellow Dot program is currently active in approximately 22 states.

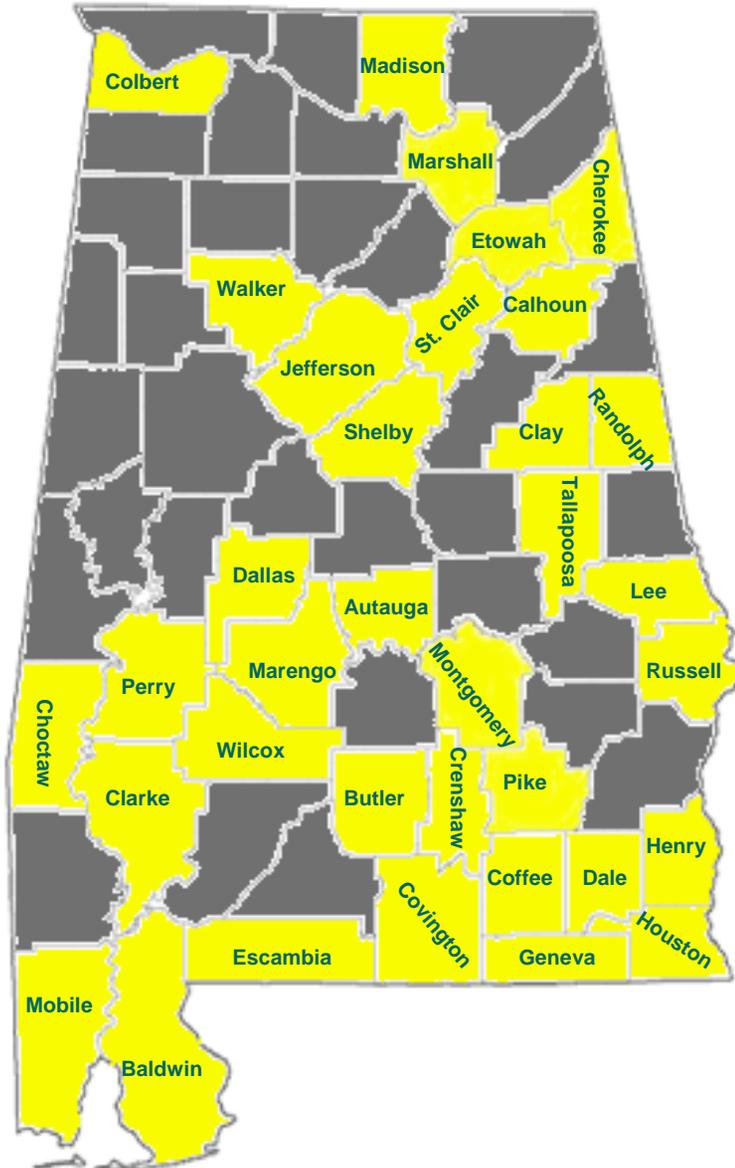

“Yellow Dot” Program

“Yellow Dot” Program

Participating Counties

Why “Yellow Dot”?

- Assist the first responder in their job of saving lives
- Save time
- Voice for injured when they are unable to speak for themselves

How Will “Yellow Dot” Help?

- Allow the first responder to have pertinent personal and medical information when they arrive on the scene regardless of the individual's condition
- Allow first responder to use the “Golden Hour” to begin assisting the injured rather than trying to pry information out of them or someone else

No Cost to the Participant!

Participant?

In the event of an emergency, first responders can identify the vehicle as that of a "Yellow Dot" participant by locating the "Yellow Dot" in the lower left corner of the rear window.

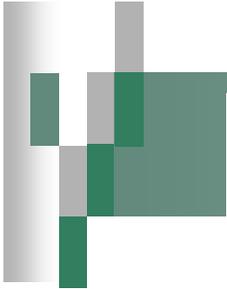

“Yellow Dot” Folder

First Responder knows to look inside the glove compartment for pertinent information.

What Information Will be Provided?

Please Note: The Yellow Dot Program is for personal information only. All information contained herein is the sole responsibility of the participant.

Please fill in information in parentheses as information changes. Include all phone numbers. Update every year.
