BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

In November of 2013, the Project Development Section of the Public Works Department requested proposals for utilities engineering services. These services are required to perform design functions that include, but are not limited to the following: computer network analyses and design of water, wastewater and gas utility systems. The purpose of the utilities engineering services request for proposals is to pre-qualify three (3) engineering firms that can provide these specialized engineering services.

This agreement will be on an as-needed basis for a period of up to five (5) years, subject to annual renewals and approved budget appropriations. It is advantageous for the City of Las Cruces (City) to have a pre-qualified list of utilities engineers from which to select, in order to get budgeted projects completed in a timely manner. All departments within the City will be able to enter into an individual project agreement with these engineering firms on an as-needed basis. There are also times when special funding (e.g., legislative, NMDOT) is made available to the

City for specific projects. The funding sources often give strict time frames within which improvements must be designed and constructed in order to secure the funding. By having a pre-qualified list of engineers, it will not be necessary to go through the extensive and time consuming Request For Proposal process in order to contract the necessary work for each individual project. This agreement will allow Public Works to contract with any one of the three (3) pre-qualified firms. As a result, valuable time is saved in the design of each project and staff time can be used on other projects and in other capacities.

The Purchasing Section received five (5) proposals that were scored and evaluated by the Selection Advisory Committee (SAC) on November 26, 2013 (see Attachment "A"). The SAC is recommending award to the top three (3) rated firms as follows:

1. Parkhill, Smith & Cooper, Inc. – Las Cruces, New Mexico
2. Zia Engineering & Environmental Consultants, LLC. – Las Cruces, New Mexico
3. CH2M Hill, Inc. – Albuquerque, New Mexico

The agreement for individual engineering projects will be authorized pursuant to the provisions of the Las Cruces Municipal Code, 1998, Chapter 24, Procurement Code and will be set up as individual purchase orders depending on available funding. In accordance with Section 24-99 (b) Authority to Award, the Purchasing Manager is authorized to enter into individual contracts with these three (3) pre-qualified engineering firms for engineering services in an amount up to \$35,000.00; contracts having a value in excess of \$35,000.00 but less than \$50,000.00 will require the approval of the City Manager; and contracts in excess of \$50,000.00 will be taken to City Council for approval prior to contracting.

City staff is requesting approval from City Council to enter into an agreement with the aforementioned three (3) selected firms on an as-needed basis for a period of up to five (5) years, subject to annual renewals and approved budget appropriations.

OPTIONS / ALTERNATIVES:

- Vote "Yes"; this will authorize the City to enter into an agreement with the three (3) selected pre-qualified firms, to provide utilities engineering services for the City on an as-needed basis. This will allow the City to have flexibility in contracting engineering projects through this agreement without having to go through the request for proposal process each time.
- Vote "No"; this will reject the proposed award and instruct staff to either re-bid, re-scope, or abandon this agreement altogether. Without this agreement, utilities engineering projects could be delayed and the City will have to explore an alternative means of procuring utilities engineering services.
- Vote to "Amend"; this could reject the proposed contract award and provide an opportunity to re-scope and re-bid the utilities engineering request for proposal.
- Vote to "Table"; this could reject the proposed contract award and abandon the project.
